

Institutions like men survey the past, inventory the present, and point toward the future. And institutions like men change with the challenge of the times.

In this mid-century year Eldon High School looks back on a glorious, growing past. From the class of three in 1910 to a class of 100 in 1951 approximately 1600 students have been graduated. The small faculty of 1910 has now been supplanted by a large professionally prepared staff of 1951. The narrow limited curriculum of 1910 has been expanded to the broad program of 1951.

We honor our past. As the school system looks ahead, it promises to expand and to grow to meet the needs of all the youth.

This is its task.
